The screenshot shows the homepage of the EU Taxonomy Compass website. The browser address bar displays ec.europa.eu/sustainable-finance-taxonomy/home. The page header includes the European Commission logo and a search bar with the placeholder text "Search for an activity". The main navigation bar is blue with the title "EU Taxonomy Compass" and three menu items: "Home" (highlighted with a yellow border), "EU Taxonomy Compass", and "Activities by sector" with a dropdown arrow. Below the navigation bar, the page content begins with the heading "About the EU Taxonomy Compass". The text explains that the compass provides a visual representation of the EU Taxonomy, starting with the [Delegated Act on the climate objectives](#) (climate change mitigation and adaptation), published on 9 December 2021, and the [Complementary Delegated Act](#), published on 15 July 2022. It also mentions future updates to include technical screening criteria for additional activities and references the [main page on EU Taxonomy](#).

About the EU Taxonomy Compass

This EU Taxonomy Compass provides a visual representation of the **contents of the EU Taxonomy, starting with the [Delegated Act on the climate objectives](#)** (climate change mitigation (Annex I) and climate change adaptation (Annex II)), as published in the Official Journal on 9 December 2021. The Climate Delegated Act entered into application on 1 January 2022. The EU Taxonomy Compass also includes the contents of the [Complementary Delegated Act](#), as published in the Official Journal on 15 July 2022. The Complementary Delegated Act will enter into application on 1 January 2023.

Looking forward, the EU Taxonomy Compass will be updated to include future delegated acts specifying technical screening criteria for additional activities substantially contributing to the climate objectives and the other environmental objectives of the Taxonomy Regulation. It will also reflect the delegated acts in the future. For more information about the EU Taxonomy and the EU Taxonomy delegated acts, please refer to the [main page on EU Taxonomy](#).

Collection and transport of non-hazardous waste in source segregated fractions

Contributing to climate mitigation ^

Description v

Substantial contribution criteria ^

All separately collected and transported non-hazardous waste that is segregated at source is intended for preparation for reuse or recycling operations.

Do no significant harm criteria ^

Climate adaptation v

Water v

Circular economy ^

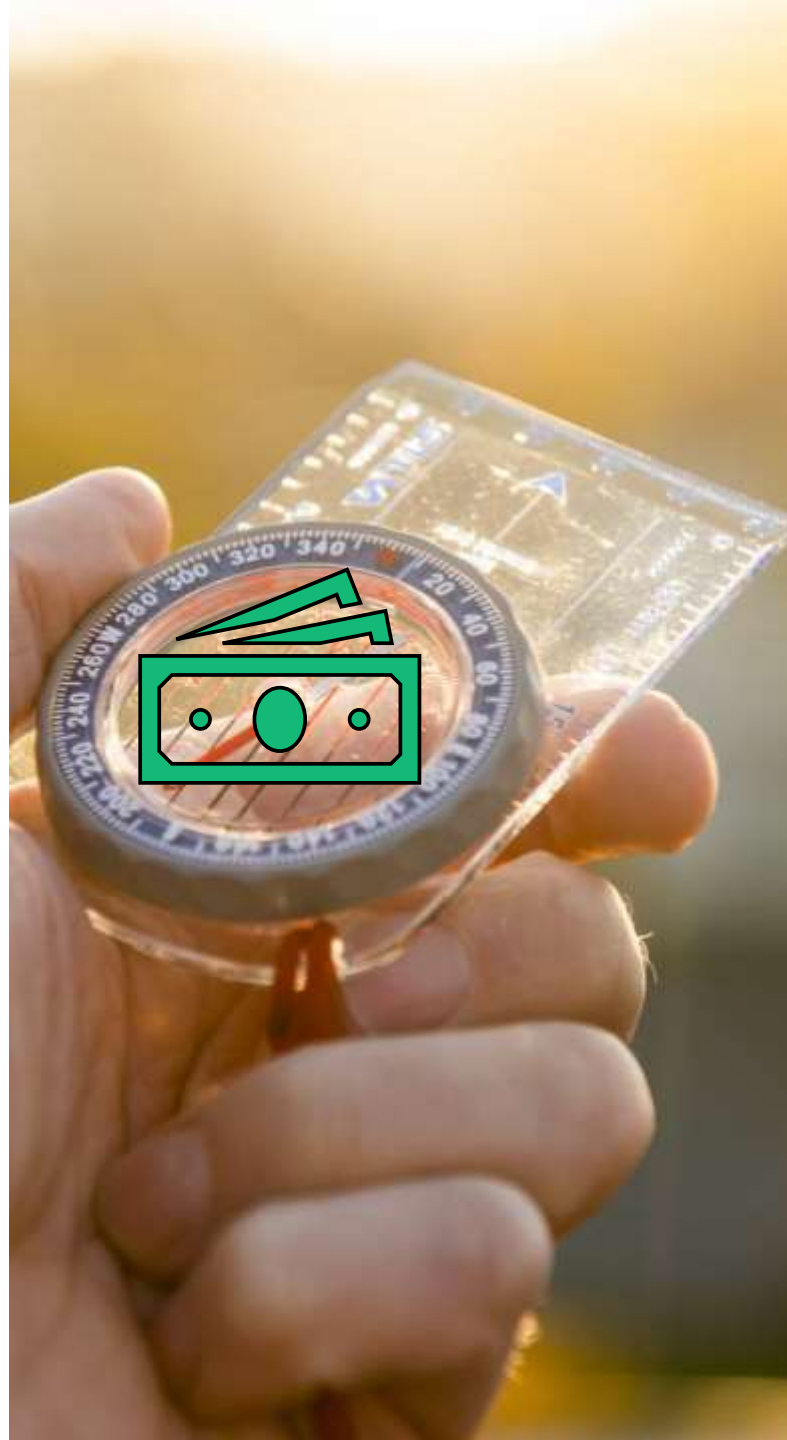

Separately collected waste fractions are not mixed in waste storage and transfer facilities with other waste or materials with different properties.

Pollution prevention v

Biodiversity v
